
Technical Design Document

Documentation Preview

This preview contains the Table of Contents and List of Figures from the TV-Messenger Specification and Implementation Project Notebook.

It is provided to illustrate the scope and level of technical, operational, and implementation documentation available for qualified review.

TV Messenger Services, Inc.

Proprietary and Confidential - Released under NDA

TV-Messenger™

*Getting the Message Across
For You, the Whole Family, and Other Loved Onessm*

Specification and Implementation Project Notebook

Contents

Table of Figures.....	10
1. Introduction.....	11
2. Origin.....	11
3. Feature Summary – MVP.....	11
4. Major Subsystems and Interfaces.....	12
5. The M-brAln™.....	12
6. Functionality and Services of Major Subsystems.....	13
6.1 Website.....	14
6.1.1 Product/Service Description.....	14
6.1.2 User Registration, Service Startup.....	14
6.1.3 Set Messaging Data / Confirm or Change TV displays.....	15
6.2 Billing System.....	17

6.3	Database.....	17
6.3.1	Account Table.....	18
6.3.2	Payment History.....	19
6.3.3	Authorized Users.....	19
6.3.4	Device Table – And assignments to account.....	19
6.4.5	Timeout.....	21
6.3.6	Ticker Feature Table.....	21
6.3.7	Weather Feature Table.....	22
6.3.8	Stock Portfolio Feature Table.....	22
6.3.9	Sports Ticker Feature Table.....	23
6.3.10	Website Viewing Feature Table.....	23
6.3.11	Outbound Call Data.....	24
6.4	Twilio phone/text/voice interface.....	24
6.5	Data processing system (DPS).....	25
6.5a	Note: 01-26-25 – Production Version of DPS processing.....	26
6.5.1	DPS Functions Implemented as of 11-01-24.....	27
6.5.2	Debug Log of DPS, TVI, and other systems.....	33
6.5.3	Registration Processing and TVI.....	34
6.5.4	Calling the DPS Functions.....	35
6.5.5	Callback – Optional return of data from DPS.....	36
6.5.6	Python Code to Spawn and Execute 10 DPI processing tasks.....	37
6.5.6	DPS – Registration and Display Ticker.....	38
6.6	Mobile app.....	39
6.7	TV interface system.....	46
7.0	Ticker Message Processing.....	46
8.0	Communicating with the TV Interface System.....	47
9.0	Twilio Call Flows.....	48
9.1	Telephone call flows (Voice).....	48
9.1.1	Confirm receipt of message or delete message on screen.....	48
9.2	Telephone call flows (SMS/Text).....	50
10.0	Support.....	50

11.0	Multi-Lingual Support.....	50
11.1	DPS support of Language for Subsystems.....	50
11.2	Implementation of Language Translation.....	51
11.3	Time to Create Initial Language Translation Cache.....	52
12.0	Time Functions.....	73
13.0	Fixed Constant Objects.....	74
14.0	TV Display Layout Specifications and Examples.....	74
14.1	Layout Specifications.....	74
14.2	Sample Display Screens.....	76
15.0	Email and SMS.....	77
15.1	Emailing a caregiver.....	78
15.1.1	Alert Email Format.....	78
15.2	Texting a caregiver.....	79
16.0	Interprocess Communications – Communicating with the DPS.....	80
17.0	Data Logging.....	81
18.0	Typical Account Creation and TV Messaging.....	84
18.1	Setting up an M-brAIIn device that will go the account owner.....	84
18.1.1	Accessing Third-Party System for Initial M-brAIIn Setup.....	85
18.2	M-brAIIn Internet Connectivity.....	85
18.3	Setting Up New Accounts on the TVM service.....	86
18.3.1	Assigning the M-brAIIn to an account.....	86
18.3.2	Registering the Account and Device.....	87
18.4	Putting a Message on the Ticker.....	87
18.5	Removing a Ticker Message.....	88
19.0	Start/Stop Operations.....	89
20.0	M-brAIIn Device Status.....	90
21.0	Python Dependencies – Modules to include.....	91
22.0	Statistics.....	95
23.0	DPS Language Translation Support.....	98
23.1	Languages Supported.....	99
24.0	ChatBot.....	105

25.0	Windows to Linux changes required.....	106
Appendix A- Data Processing Calls and Data Structures.....		107
1.0	Introduction.....	107
2.0	Calling Data Processing Functions.....	107
2.1	Get M-brAln Object Identifier.....	109
2.2	Assign M-brAln device.....	109
2.3	Set Ticker.....	109
2.4	Reassign M-brAln.....	110
3.0	Error Returns.....	110
4.0	Database calls required.....	111
4.1	M-brAlnCheck.....	112
4.2	M-brAlnAssign.....	112
4.3	GetTickerMessages.....	112
4.3	DeleteTickerMessage.....	113
4.4	DeleteAllTickerMessages.....	113
4.5	WriteTickerTodB.....	113
Appendix B – Database Calls and Functions.....		114
1.0	Introduction.....	114
2.0	dbRequest().....	114
2.1	Types of Requests.....	114
2.1.1	dbRequests Simulated – 10/28/24.....	114
2.1.2	dbMbrAlnCheck.....	115
2.1.3	dbMbrAlnAssign.....	115
2.1.4	DeleteAllTickerMessages.....	116
2.1.5	GetAllTickerMessages.....	116
2.1.6	DeleteTickerMessage.....	116
2.1.7	GetTickerMessages.....	116
2.1.8	Full List of Database Request Calls.....	116
2.1.8	dbGetObj and dbPutObj.....	117
2.2	Other Database Functions.....	119
Appendix C – Software File Layout – DPS Startup & Operating Flow.....		120

1.0	Software folders.....	120
2.0	TVM-Startup.py – Starting up the DPS server software.....	120
3.0	TVM Server Processes, Threads, Events, Queues, PIPEs, and Locks.....	121
4.0	Keeping the TVM Server Running through crashes.....	123
Appendix D – Implementation Notes.....		125
1.0	Functions Implemented.....	125
1.1	DPS and database Functions.....	125
1.2	Assign Account or Device ID.....	128
1.3	Assigning Numeric Account ID with Check digit for Telephony input.....	128
2.0	Data Structures used.....	129
2.1	Stock Ticker Request and Response.....	130
Appendix E – To Do / Future Additions.....		131
1.0	To Do.....	131
2.0	Future Functions to add.....	132
Appendix F – Problems to address – Issues to Address.....		134
Appendix G – Operational Costs.....		135
Appendix H- Marketing Leads / Ideas.....		136
Appendix I – Calendar of Events.....		137
Appendix J – Hardware needed for service.....		139
1.0	Per Customer TV.....	139
Appendix K – Future Features.....		140
Appendix L – Live TV full displays.....		141
Appendix M – System Startup in Test Mode.....		143
Appendix N – Operation of Ticker Escalation Mode.....		148
Appendix O – Set up of M-brAIIn device and Wi-Fi.....		150
1.0	Hardware Setup.....	150
2.0	Registration on 3rd Party Server and assignment to TVM account.....	153
3.0	Wi-Fi setup.....	154
Appendix P – setStockTicker Stock Quote Service.....		156
Appendix Q – setWeatherTicker – Weather Ticker.....		158
Appendix R – setSportsTicker – Sports Ticker.....		161

1.0	Sports Support.....	161
1.1	NBA Standing Example.....	162
1.2	NBA Games Example.....	163
2.0	Sports Implementation.....	164
2.1	Rate Limiting.....	165
2.2	NBA (US Basketball) Standings.....	167
2.3	NBA Games.....	169
3.0	NFL.....	170
3.1	Sample NFL / NCAA Ticker.....	170
	Appendix S – LLM Integration.....	171
1.0	Background.....	171
2.0	Implementation.....	171
	Appendix T – TVM-Utility.....	174
1.1	TVM Utility Console Display.....	174
	Appendix U – Web Page TV Display Integration.....	176
	Appendix V – Intersystem Communications.....	177
1.0	DPS REST API.....	177
2.0	SendWork2HTTPdps.....	177
3.0	DPS implementation.....	178
4.0	Reserved ports.....	179
5.0	Using the TVM REST API.....	180
	Appendix W – Steps to add a new DPS function.....	183
	Appendix X – Assigning numeric account numbers.....	184
1.0	The issues.....	184
2.0	Features of the Account Number Algorithm.....	184
3.0	Account Number Algorithm.....	185
	Appendix Y – Reflashing the M-brAI{n firmware.....	187
1.0	USB Method.....	187
2.0	Etcher Method to reflash SD Card.....	188
	Appendix Z – http → https – SSL Certification Integration.....	189
1.0	Obtaining an SSL certificate (a.k.a. TLS).....	189

2.0	Preparing for certification.....	189
3.0	Renewing Certificates.....	191
4.0	Automating the Certificate renewal process.....	192
5.0	Change to Dynu DDNS and tvmdpsapi.link.....	193
	Appendix AA – References – Other Documents.....	196
	Appendix AB – Retrieve last TV image captured.....	197
	Appendix AC – Remote viewing of console.....	198
	Appendix AD – Using the QR code to set up WIFI.....	200
	Appendix AE – Auto Updating and Message Canceling.....	202
	Appendix AF – Establishing the PostgreSQL database.....	203
1.0	Move from in-memory database to Postgres.....	203
2.0	Opening Database.....	203
3.0	Creating and Migrating from the in-memory to Postgres Dataabase.....	204
4.0	Postgres database structure and In-memory to Postgres Migration.....	206
5.0	ASCII to UNICODE/UTF8.....	214
6.0	Further Database Additions.....	215
6.1	Users table.....	215
6.2	Confirmation Button.....	216
6.4	Devices – Update 1.....	217
6.5	Table/Column Checks, keys, and indexes.....	217
6.5.1	Accounts.....	218
6.5.2	Devices.....	219
6.5.3	Weather.....	220
6.5.4	Stocks.....	221
6.5.5	Sports.....	221
6.5.6	Messages.....	222
6.5.8	Confirmation Buttons.....	223
6.6	Change to Users Database.....	224
	Appendix AG – TVM Production Server and Monitoring.....	226
1.0	Server.....	226
2.0	Server and Website Monitoring.....	226

3.0	TVM-server online at vps123727.inmotionhosting.com.....	227
	Appendix AH – DPS Debug and Operational Diagnostics and Monitoring.....	229
1.0	Expansion of DPS diagnostic monitoring for multiple DPS tasks.....	229
2.0	Internal Support for multi-tasking.....	230
	Appendix AI – User Registration and Log in.....	231
1.0	User Registration Request.....	232
1.1	User Registration api calls.....	233
1.2	Email Address and SMS confirmation and Change Password Processing.....	234
1.2.1	Confirm Email or SMS number.....	234
1.2.2	Change Password is Forgot Password.....	236
1.2.3	Recovery from missing data.....	237
1.3	UserLists Database – Awaiting User Responses.....	237
2.0	Login.....	238
	Appendix AI – Overall Scope of the TVM Components.....	240
	Appendix AJ – Mobile and Web app.....	241
1.0	Database Schema Changes.....	241
	Appendix AK – API Processing Watchdogs.....	243
	Appendix AL - Billing System.....	244
1.0	Call Flow.....	245
2.0	Assigning System Variables.....	245
3.0	Shipping Rates.....	246
	Appendix AM – POSTGRES database Configuration & Issues.....	247
1.0	Configuration.....	247
	Appendix AN – TVM App Admin Mode.....	248
1.0	Automatic Disabling of Admin Mode.....	248
2.0	Backdoor to Admin screen.....	249
	Appendix AO – Recurring Messages.....	250
1.0	Recurring Database.....	250
	Appendix AP – GIT repository.....	252
	Appendix AQ – Changes between Production and Testing.....	253
	Appendix AR – Pending Patent 64/082,859.....	254

Table of Figures

Figure 1 - Overall System Architecture.....	12
Figure 2 - DPS Processes.....	24
Figure 3 - DPS Processes (Generalized).....	47
Figure 4- Normal Ticker Display without Escalation.....	75
Figure 5 - Escalation Level 1 Display.....	75
Figure 6- Escalation Level 2 Display.....	76
Figure 7- Escalation Level 3 Display.....	76
Figure 8 - General Interprocess Communications Mechanism.....	80
Figure 9 - M-brAIIn Network Registration Display.....	84
Figure 10 - Statistical Report.....	95
Figure 11 - Supported Languages.....	104
Figure 12 - Wiring Diagram of M-brAIIn and components.....	149
Figure 13 - M-brAIIn Device.....	150
Figure 14 - Connecting Video Capture Device.....	150
Figure 15 - Connecting Power and TV Video.....	151
Figure 16 - M-brAIIn video output HDMI cable to TV via F/F connector.....	151
Figure 17 - Sports I/O to support rate limiting.....	166
Figure 18 - M-brAIIn scrolling output for answers.....	172
Figure 19 - HTTP processing threads and processes.....	178
Figure 20 - Database access via TVM REST API.....	179
Figure 21- Firmware update from USB 1 of 2.....	186
Figure 22- Firmware update from USB 2 of 2.....	187
Figure 23 - Screenshot of current image on TV.....	196
Figure 24 - Remote viewing of server console.....	198
Figure 25 - Using the QR code for WiFi setup.....	199
Figure 26- Wifi Setup Displays on Smartphone.....	200
